

# Please Welcome Dr. Jean Creighton!

## Bio of Presenter, Dr. Jean Creighton

Dr. Jean Creighton has always been inspired by how the cosmos works. She was born in Toronto, Ontario and grew up in Athens, Greece where her mother claims she showed a great interest in how stars form from the age of five. She studied physics at the University of Athens and went on to earn a Master's degree from Saint Mary's University in Halifax, Nova Scotia, and a PhD in Astrophysics from the University of Waterloo. She began teaching astronomy at UW-Milwaukee in 1999 and in 2007, she took over as director of UWM's Manfred Olson Planetarium.

In 2014, Creighton was selected by NASA to be an Airborne Astronomy Ambassador and spent 20 hours in the stratosphere on SOFIA, the largest moving observatory in the world. She's very proud to have shared the cosmos with over 150,000 members of the community.

### Monday, July 8: Solar System Expedition

**OWT 6:30PM**

Enjoy an interactive tour of our cosmic neighborhood, the solar system. Marvel at the Sun's powerful flares, Jupiter's swirling storms, and Saturn's intriguing moons before traveling to the icy worlds of the Kuiper Belt as you behold the latest discoveries in space exploration.

### Monday, August 5: Northern Lights

**OWT 6:30PM**

Enjoy the radiance of the night sky and colorful displays of dancing lights with a behind-the-scenes tour of the science behind one of nature's most remarkable light shows.

### Monday, September 16: Exploring Exoplanets: James Webb Space Telescope

**OWT 6:30PM**

The world is buzzing about the James Webb Space Telescope, the largest and most powerful space telescope ever built that will serve as the premier deep space observatory for the next decade. Learn about our ever-expanding view of the universe and the search for new and exciting worlds beyond our solar system.

Sign up runs: July 8th-July 15th  
Wellness Table
